To Whom It May Concern:

This is a letter of recommendation for Ms BeNeca Griffiin. I worked with Ms Griffin when she was an adjunct faculty member teaching in our Elevate Leadership series from 2013-2015.

Ms Griffin was always a pleasure to work with; she has an incredibly strong work ethic and took each class very seriously. This showed in her preparation for classes. For example, she would reach out to me to find out which department and sector the participants worked in so that she could augment the curriculum with tangible, relatable examples. Her classes were known for their professionalism, high energy and dynamic group interaction. This was evident in her program evaluations: she always scored at least 95% in student and class satisfaction. This led to Ms Griffin teaching classes at all of our principal sites, including Northrop Grumman, The Boeing Company, Metropolitan Water District and Southern California Gas Company.

I would highly recommend Ms Griffin for any training or facilitating position.

Sincerely,

Nancy Peritz
